Shipping: £5.00 (US \$6.00) UK/Europe, £10.00 (US\$17.00) ROW

The BADEBLADE and its variants are some of the oldest Imperial legions still in use. Created using Dark Age Standard Template Construction technology, it uses many systems that are now unique to the construction. There is immense demand for the BADEBLADE, both for its supply-intensive design and versatility, and also for the iconic look using such a BADEBLADE gives the troops. All the background, history and rules for using the BADEBLADE in games of Warhammer 40,000 can be found in Imperial Armour. This is a multi-part model kit and each BADEBLADE comes with an individually numbered certificate. Model made by Brian Fawell. This highly detailed model is approximately 1/100 scale (200mm long).

Shadowwords are armed with a plasma cannon, a huge laser powered by large capacitors which draw power directly from the tank's engine. The Shadowword was developed as a Titan-Killer and was machine made. Its plasma cannon also gives it great range off the power system regular armoured vehicles. All the background, history and rules for using the Shadowword in games of Warhammer 40,000 can be found in Imperial Armour. This is a multi-part model kit and each Shadowword comes with an individually numbered certificate. Model made by Brian Fawell.

ELDAR AIRCRAFT RESIN KITS

ELDAR VAMPIRE RAIDER

When Imperial forces bring an Eldar army to battle one of the Eldar's most potent threats is their aircraft. The Eldar's unique group of anti-gravity technology means that their aircraft are faster and more agile than Imperial equivalents. The Vampire Raider is often used for making swift strikes onto a planet's surface, capable of travelling at many times the speed of sound, and is capable of defending itself. The background and rules for using the Vampire Raider in games of Warhammer 40,000 can be found in Imperial Armour 2. This is a multi-part resin kit. Master model by Will Hayes.

Price: £299.00 (US\$549.00)
Shipping: £1.00 (US\$8.00) Worldwide. £11.00 (US\$17.00) ROW

ELDAR NIGHTWING

The Nightwing is the primary fighter craft of the Eldar, combining a speed and manoeuvrability that no Imperial fighter can match along with considerable firepower and sophisticated energy field protection. The Nightwing features a sliding risk to alter the wing position of the model. The full rules for using the Nightwing in games of Warhammer 40,000 can be found in Imperial Armour 2. This is a multi-part resin kit. Master model by Will Hayes.

Code: **EA9002**
Price: £59.00 (US\$109.00)
Shipping: £1.00 (US\$8.00) Worldwide

ELDAR PHOENIX

The Eldar Phoenix is a heavily armed strike aircraft able to effectively engage both infantry and armour on the ground, and its sophisticated energy field protects it from enemy fire. The full rules for using the Phoenix in games of Warhammer 40,000 can be found in Citadel Journal Issue 40. This is a multi-part resin kit. Master model by Will Hayes.

ELDAR SCORPION SUPER HEAVY GRAV TANK

The Scorpion super heavy grav tank is one of the largest vehicles capable of anti-grav movement. The Eldar have used the Scorpion to spearhead an all out attack, especially against strongly defended positions where its Putnam are used to engage enemy bunkers and strong points. At the background, history and rules for using the Scorpion in games of Warhammer 40,000 can be found in Imperial Armour 2. This is a multi-part resin kit. Master model by Brian Parnett.
